1. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 16-18, 28-30, 34 are rejected under 35 U.S.C. 102(b.) as being clearly anticipated by Schenk.

See especially, column 2, lines 56-61 which indicate that the Schenk circuit was for a transceiver, which modulated the output signal. See especially figure 3, and column 5, line 22-28, the PL0 includes a voltage controlled oscillator (VCO) locked to another oscillator – which operation describes a phase locked loop, which VCO provided an output signal and a feed back signal which was compared with an external reference signal, and the voltage control signal comprising voltage and current. See especially figure 2, divider 13a and mixer 15. See especially figure 2, the BPF's 17-20.

4. Claims 19-27, 31-33 and 35 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent

form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Mis whose telephone number is 7033084907. The examiner can normally be reached on M-Th.
